Welcome!

All equipment manufactured by Galaxy Multi Rides is designed with a high regard for safety as well as operational ease.

The information contained within this manual will assist you and your operators in producing safe and enjoyable entertainment for your clients.

This instruction manual has been supplied for the purpose of assisting you in the proper and safe operation of your new Galaxy Multi Rides game. You can also find this manual on line in our website. Look for "Safety and Training" under the "Resource" tab in www.galaxymultirides.com. You can also view our safety video ("How To" playlist) on our YouTube channel (www.youtube.com/galaxybulls).

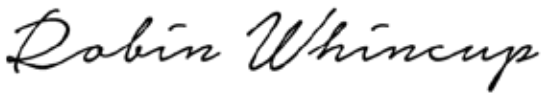
This manual will also guide you through the proper set up procedures, ensuring the safest and most enjoyable experience for your clientele, and maintenance recommendations that will facilitate top performance and a long life for your game. Your inflatable attraction is constructed by following the procedures and using quality materials, all in compliance with the ASTM standards.

Galaxy Multi Rides takes great pride in delivering to you inflatable games manufactured, inspected and tested with a focus on the highest safety standards and top quality workmanship. Additionally, many other inspections and tests are performed to ensure your new game meets the first class standards of Galaxy Multi Rides.

Safety is everybody's major concern. At Galaxy we go to great lengths to ensure that our products are the safest on the market. On our website (look for "Safety and Training" under the "Resource" tab in www.galaxymultirides.com), there's a training Safety Questionnaire that you can complete on line. **PLEASE, read this manual thoroughly and complete the questionnaire for every member of staff who's going to operate the ride**. All the answers to the questions are in this manual.

By having a quality safe machine and competent operators, this can only be a good thing, which will result in more cost effective insurance for everyone.

If you experience any difficulty in any of the procedures set forth in this manual, please call 941 697 0324.



Robin Whincup
President of Galaxy Multi Rides

What's in the Box

1 x Air Court inflatable mat
1 x Set of foam padding edging (if purchased)
1 x High pressure inflation blower

Electrical Information

BLOWERS
Blowers may be different from those pictured

Setting Up Your AirCourt™

CAUTION: WHEN UNPACKING THE AIR COURT AND PADDING DO NOT USE KNIVES.

Make sure the surface you are installing the Air Court on is smooth, clean and free from any sharp objects. We would advise installing a carpet subfloor or tarps.
Roll out the Air Court in the installation area. Measure the position from any surrounding walls to ensure you have enough room for the foam padding edging (if purchased)
Once you have the Air Court in the correct position it is now ready to inflate. There are 4 inflation valves, one on each corner. Connect both high pressure inflation blowers and inflate the Air Court to maximum **9 PSI**
DO NOT OVER INFLATE
Once inflated you can double check the measurements of the position to the surrounding walls. If you need to make any adjustments it is easier to move the Air Court when it is inflated.

Installing the Outer Edge Padding (If purchased)

Each pad is numbered. These correpsonde with the installtion diagram included with your Air Court.
Start at the center line of the court and work your way around the Air Court in a clockwise motion untill your last pad is back where you started.

Maintenance, Cleaning and Repairs.

We recommend a dry microfiber mop or "swiffer" to collect any dust and light debris that might be on the court.
For cleaning any dirt and sanitizing the unit we recommend a Odoban solution fogged/misted over the unit and wiped down with a clean swiffer style mop.
Do not use
No toxic cleaners
No solvent cleaners
No Bleach

Please note that air can get trapped under the Air Court creating an unlevel surface. To rectifcy this please deflate the Air Court and fold the Air Court back on itself to release the trapped air pressure. Then reinfalte the Air Court

Repairs

The Air Court comes complete with vinyl patches and HH-66 vinyl cement plus three rolls of Tear-Aid which is clear plastic "tape" that seals any leaks/holes. When making any repair the Air Court must be fully deflated.

The vinyl patches and HH-66 vinyl cement offer a stronger, more permanent repair. How to make a repair with a vinyl patch:

1) Cut the vinyl repair patch into a circle shape to a size allowing a minimum of a 2" border around the puncture.
2) Place the repair patch over the "hole" and draw around the vinyl patch.
3) Make sure the area around the puncture is clean and free from dirt or dust.
4) Using the HH-66 vinyl cement coat the rear side of the vinyl patch and the area you have marked.
5) Apply the HH-66 vinyl cement right up to the edges of the patch and the area you have marked.
6) Follow the instructions on the HH-66 vinyl cement packaging.
7) Firmly press the patch onto the repair area, wipe away any glue that has oozed out.
8) Leave the repair to set for 8 hours before you inflate the Air Court.
